Amendments to Claims

1 Claims 1 to 10 (Cancelled)

1 11. (Original) A delivery system for endovascular devices, comprising: a
2 first sheath having a distal end and a proximal end and containing at
3 least a first expandable device at a proximal end;

4 a second sheath movable within the first sheath and having a
5 respective distal end and a respective proximal end, the respective
6 proximal end concluding distally of the first expandable device and
7 containing a second expandable device;

8 a first pusher associated with the first expandable device
9 extending thereto within the first and second sheathes from a first
10 proximal control pusher end exposed at the distal ends of the first and
11 second sheathes; and

12 a second pusher associated with the second expandable device
13 extending thereto within the first and second sheathes from a second
14 distal control pusher end exposed at the distal ends of the first and
15 second sheathes.

1 12. (New) A delivery system for endovascular devices as in Claim 11
2 wherein the first expandable device comprises an attachment graft tube
3 having proximal and distal end portions and defining a lumen
4 therethrough and further including an attachment stent extending
5 proximally from the proximal end portion.

1 13. (New) A delivery system for endovascular devices as in Claim 12
2 wherein the second expandable device comprises a contra-lateral leg
3 extension.
